

Technical & Commercial Proposal: PalikaOS SaaS Subscription

Prepared For: [Municipality/Rural Municipality Name]

Date: [Date]

Prepared By: [Your Company Name]

Contact: [Your Contact Information]

1. Executive Summary

Local governments in Nepal face significant challenges in managing citizen data, processing service requests, and maintaining transparent tax records. Manual, paper-based systems lead to delays, data loss, and citizen frustration.

PalikaOS is a next-generation, cloud-based Municipal Management System designed specifically to digitize and automate the core operations of Local Governments in Nepal. By adopting PalikaOS, [Municipality Name] will transition to a fully digital, paperless, and citizen-centric governance model.

This proposal outlines the deployment of PalikaOS as a Software-as-a-Service (SaaS) subscription, ensuring zero upfront infrastructure costs, continuous updates, and immediate deployment.

2. Key Objectives & Benefits

- **100% Digitization:** Move away from paper registers (Darta Chalani) to a secure, searchable digital database.
 - **Citizen Convenience:** Citizens can track complaints, verify digital certificates, and receive SMS updates without visiting the ward office multiple times.
 - **Revenue Growth:** A dynamic, automated Tax Engine ensures accurate tax calculations, reducing human error and increasing municipal revenue collection.
 - **Zero IT Overhead:** Delivered as a fully managed cloud service. We handle the servers, backups, and security.
-

3. Core Modules Included

Your subscription to PalikaOS includes full access to the following integrated modules:

1. **Ghatana Darta (Vital Events):** Digital registration and instant certificate generation for Births, Deaths, Marriages, and Migration. Includes verifiable QR codes.
2. **Dynamic Tax & Revenue Engine:** Automated calculation of Property, Business, and Rent taxes based on rules set by your municipal assembly. Includes eSewa integration for digital payments.
3. **Document Approvals (Sifaris):** Multi-stage digital approval workflows for official recommendations (Sifaris) with digital signatures.
4. **Darta Chalani (Correspondence):** A complete digital registry for incoming and outgoing official letters with scanned PDF attachments.
5. **Citizen Grievance & Service Requests:** A centralized dashboard to log, assign, and track citizen complaints ("Hello Mayor") and service requests.

6. **Departmental Dashboards:** Specialized data tracking for Health, Education, Infrastructure, Agriculture, and Disaster Management departments.
 7. **Public Citizen Portal:** A white-labeled public website where citizens can track their application statuses using Tracking IDs.
-

4. White-Label Branding & Multi-Tenancy

We recognize that [Municipality Name] has its own unique identity. PalikaOS provides a **White-Label** experience:

- **Custom Subdomain:** Your portal will be accessible at [https://\[name\].palikaos.com](https://[name].palikaos.com) (or your own custom domain).
 - **Brand Customization:** The system will dynamically adapt to use your official Municipality Logo and brand colors across all dashboards and printed receipts.
-

5. Security & Data Sovereignty

- **Role-Based Access Control (RBAC):** Strict permissions ensure that Ward Officers only see data relevant to their ward, while the Chief Administrative Officer (CAO) has a complete overview.
 - **Immutable Audit Logs:** Every action taken in the system is recorded (Who, What, When) to ensure total accountability and prevent fraud.
 - **Daily Backups & Encryption:** All citizen data is encrypted in transit and at rest, with automated daily backups to prevent data loss.
-

6. Subscription Pricing & Tiers

Unlike traditional software that requires massive upfront capital expenditure (CAPEX) for servers and licenses, PalikaOS operates on an affordable, predictable annual subscription (OPEX).

Please select a tier that fits your municipality's size:

Option A: Standard Tier (Suitable for Rural Municipalities)

- **Price:** NPR [X,XXX] / Year
- **Includes:** Up to 15 Admin/Ward Users
- **Storage:** 50 GB Cloud Storage (For Scanned Documents)
- **Support:** Standard Business Hours Support (Email & Phone)

Option B: Professional Tier (Suitable for Municipalities / Sub-Metropolitan)

- **Price:** NPR [X,XXX] / Year
- **Includes:** Unlimited Users
- **Storage:** 500 GB Cloud Storage
- **Support:** 24/7 Priority Support & Dedicated Account Manager
- **Extras:** Custom API integrations (e.g., specific banking APIs)

(Note: Pricing is inclusive/exclusive of VAT. Implementation & Onboarding training is a one-time fee of NPR [X,XXX].)

7. Implementation Roadmap

Upon signing this proposal, [Your Company Name] guarantees the following rapid deployment schedule:

- **Week 1:** Provisioning of your dedicated PalikaOS instance, custom branding, and URL setup.
 - **Week 2:** Configuration of your specific Tax Rules and Ward structures.
 - **Week 3:** On-site or remote training sessions for Ward Officers and administrative staff.
 - **Week 4:** Go-Live! The system is fully operational for public use.
-

8. Next Steps

To move forward with modernizing [Municipality Name]'s digital infrastructure, please review this proposal. If the terms are acceptable, sign below to initiate the onboarding process.
